

TENTATIVE SCHEDULE-AT-A-GLANCE

2024 Region III Annual Spring Meeting

WORKSHOPS (May 4-5, 2024)					
WS1	Saturday, May 4	Pre-Award Basics	Basic	1/2 day	Whether new to the profession or coming from a different niche of research administration, the pre-award phase of the sponsored projects lifecycle includes an overwhelming amount of information. This session aims at introducing the major components of pre-award at a high level. This includes reading a solicitation, preparing a budget, submitting a proposal, reviewing an award, and managing non-financial aspects of a project. This session focuses on the most common pitfalls and challenges those areas bring so attendees can avoid major issues in their early days as a pre-award research administrator.
WS2	Saturday, May 4	Navigating Self-Management and Leading Others	Advanced	1/2 day	Join us in this workshop as we explore effective strategies for handling your own responsibilities while also overseeing others. Mastering the art of responding to faculty, staff, and colleagues is crucial in the dynamic and fast-paced environment we operate
WS3	Saturday, May 4	The Road to Becoming Your Best Self	Overview	1/2 day	
WS4	Saturday, May 4	NSF Primer	Overview	1/2 day	This session will provide an overview of NSF proposal and award policies and procedures as outlined in the Proposal and Award Policies and Procedures Guide (PAPPG). Attendees will learn about proposal preparation and submission requirements, the merit review process, and post-award policies and terms
WS5	Sunday, May 5	Lane Change Ahead...Department Research Administration Reconstruction to a Hybrid Model	Overview	1/2 day	As Rollins School of Public Health Research Administrative Services (RAS) moves from a Pre-Award RA and Post-Award RA to a Hybrid mixture of Cradle-to-Grave RAs and Pre-Award RA and Post-Award RA, how did we answer the following questions: 1) What do we need to make this change; 2) How do we determine the needs of the RAS, School and Pls; 3) What steps did we need to take to get started; and 4) What steps did we need to take to ensure there were no accidents
WS6	Sunday, May 5	Post-Award Basics	Basic	1/2 day	This session will explore effective pre-award strategies for maximizing post-award success and will delve into the functional details of topics such as award acceptance and/or negotiation, financial system account set up, cost accounting standards, subcontracting and subrecipient monitoring, budget and other modification, billing and cash management, effort reporting, and project closeout.

WS7	Sunday, May 5	Budget Building Blocks for Research Administrators	Basic	1/2 day	<p>Are you ready to start building a budget for your sponsored project proposal, but don't know where to begin? Don't let budget building intimidate you, we can help! If preparing a proposal budget seems like an impossible task, this session is for you. Join us and learn how to confidently build an effective project budget.</p> <p>An effective budget is the roadmap that helps your team reach their project goals. An important part of any grant proposal, the budget requires careful consideration to ensure compliance with applicable rules and policies that govern sponsored project costs. Its main purpose is to help ensure that your team has the funds needed to complete the project successfully without leaving resources on the table. In this workshop we will walk through the many aspects of developing a project budget including: how to interpret sponsor budget guidelines, what costs need to be covered, categorization of budget costs, other considerations such as cost-sharing and F&A waivers, utilizing the appropriate rates as required, budget justifications.</p>
WS8	Sunday, May 5	Pandemic Pandemonium: Lessons Learned in Hiring, Onboarding, and Retaining Research Administration Staff	Intermediate	1/2 day	<p>Pre-pandemic, hiring in research administration was largely bound to the geographical area of an institution. Candidates seeking to progress in their career often faced relocating to new cities with a change of workplace. Fast forward four years, the landscape is no longer recognizable as the job market pendulum has swung the other direction to a mostly remote work environment. As managers, we need to re-think our approach to hiring, onboarding, training, and retention to be able to recruit and keep talented employees. In this workshop we will provide a central office and departmental view of how the job market has changed and what lessons we have learned along the way.</p>
WS9	Sunday, May 5	Managing a Research Portfolio: A Departmental Perspective	Basic	1/2 day	<p>The role of the Departmental Research Administrator requires flexibility, significant communication skills, and the ability to navigate ever-changing priorities and policies. Responsibilities associated with research administration can be overwhelming. The process of putting a proposal together, managing a grant once funded, and properly closing it out at the end are just a fraction of the day-to-day activities department administrators juggle. This workshop will focus on topics that influence the daily operations of managing sponsored awards from a post award Perspective. It is designed for departmental research administrators and will provide them with an overview of the significant principles and issues surrounding proposals, grants, and contracts. Topics will include budget development, identifying key personnel, sub-recipient vs. vendor, and cost sharing. This session will also focus on project management tasks, e.g., financial reports, account reconciliation, closeout of awards, cost transfers, allowable and allocable costs and much more.</p>

WS10	Sunday, May 5	NIH Unplugged	Overview	1/2 day	Every successful journey starts with a good foundation. If you are new to working with the NIH, this presentation will answer key questions. What is the NIH? Where do I start? Who to contact when I need help or advice? What's the application process and how long does it take? I will walk you through the grants life cycle and give you an overview of key resources you will need to be successful.
WS11	Sunday, May 5	Exploring AI Implementation Across	Overview	1/2 day	Free Workshop...space limited
