Statement of Interest
Secretary, NCURA Region III
Becky L. Welch

I am honored to be nominated for the position of Secretary of NCURA Region III and am pleased to submit my statement of interest in serving the Region in this capacity. NCURA has played an important role in my professional development, providing opportunities to learn from colleagues, build meaningful professional relationships, and contribute to the broader research administration community. I would welcome the opportunity to give back to an organization and Region that have contributed so much to my own professional growth.

Throughout my career in research administration and compliance, I have developed a strong appreciation for the value of collaboration, clear communication, thoughtful governance, and professional service. In my current leadership role, I work across a broad range of research administration and compliance functions and regularly bring together individuals with different roles and perspectives to advance shared goals. These experiences have reinforced my belief that strong professional organizations are built through engaged members, effective communication, and leaders who are willing to contribute their time and expertise in service to others.

My interest in serving as Secretary extends beyond the responsibilities of the position itself. I see this as an opportunity to become more deeply engaged in the leadership of Region III, support the work of the Region's officers and committees, and help strengthen connections among our members. I would bring to the role a commitment to organization, communication, collaboration, and follow-through, along with a genuine desire to support the continued growth and success of Region III.

I would be honored to have the opportunity to serve as Secretary and to contribute to the Region that has given me valuable opportunities for learning, connection, and professional service. I appreciate the nomination and consideration and enthusiastically accept the opportunity to stand for election.
